

Dental Aesthetics

“ Have you considered an Aesthetics offering in your practice? ”

Without even realising it your practice is already providing Aesthetic solutions for your patients. This can range from tooth whitening to composite or porcelain veneers and beyond. We hope with this collection you will see how Aesthetics can help you build upon your practice and bring in new patients.

“I used to prescribe mouthguards for teeth grinding. I now use aesthetic injectables for prevention instead of treatment with more comprehensive results.”

Dr Pamela Benito

Begin the Journey

Dr Donna Mill's Journey from Dentist to Aesthetic Dentist

“ I will never stop being a dentist as I worked too hard to become one and I do love my job, but I could never imagine doing it without the aesthetics aspect as it allows me to offer my patients so much more ”

Willington
Surgery

“

I qualified as a dentist from Leeds University in 2005 and **felt aesthetics is something a beautician should be doing, not a dentist. I did not want to be the next big name in aesthetics!**

After a colleague went on a course to 'learn Botox' they recommended it to me. I decided I would give it a try and by 2008, I was starting to see my own patients providing simple toxin treatments. I was lucky enough to have an experienced mentor; this support was a vital part of my development in aesthetics. Simply doing 'a course' can leave you woefully underprepared.

It took me almost another 10 years providing these treatments and constantly refreshing my skills, combined with further Training, to offer advanced filler treatments such as tear trough and non-surgical rhinoplasty. To offer my patients even more solutions, I also trained in non-surgical face lifts. I found myself wanting to provide even more for my patients, and started training in micro-needling, skin quality treatments, stimulating collagen, platelet-rich plasma (PRP) in skin tightening and hair rejuvenation. **Had you have asked me a decade ago if I was interested in doing this, my answer would have been “that it was not my job as a dentist”, my evolution has just happened naturally and necessarily.**

I have now come full circle and integrate aesthetics into my dental treatments. Using my Trios 3D scanner to help patients see what is possible, I now help treat bruxism using toxin as well as gummy smile lines. Plasma has been used in TMJ treatments and our implant treatments to improve bone grafts. Our practice can offer treatments to patients that our competitors down the road cannot, which sets us apart. Dentistry is stressful, although I now work in a fully private practice, I started offering aesthetics whilst working full time in a busy NHS practice. In my experience, the profit margins in aesthetics helped relieve the pressure that the UDA system can put onto dentists.

Final Thoughts

Our profession is well suited to provide these treatments as we are well versed with head and neck anatomy. We respect proportion and facial profile as we have 'an eye' for a good aesthetic result. **DENTIST's are Doctors, ENGINEERS and ARTIST's.** We work in regulated, clinical environments with rigorous cross infection and waste disposal regulations. **I will never stop being a dentist as I worked too hard to become one and I love my job, but I could never imagine doing it without aesthetics as it allows me to offer my patients so much more than they expect.**

”

TEETH WHITENING

*“Discover a brighter
shade of white with
POLA”*

SDI

YOUR SMILE. OUR VISION.

A POLA SOLUTION FOR EVERY PATIENT.

As busy dental practitioners, you need solutions that work. You also know that every patient is different and that in a world full of choice, your patients have come to expect the same when it comes to elective treatments like tooth whitening. You need a professional whitening system that has a solution to suit every patient, that's easy to use, backed up by years of proven research and clinical success – and that your patients will love.

In-practice, take-home day or night whitening and quick-fix brush-on options – all in accordance with current EU regulations limiting the amount of hydrogen peroxide in whitening products to 6% and carbamide peroxide to 16% – the pola range offers safe, effective whitening solutions for everyone. Give your patients the pola choice and watch your whitening business grow from strength to strength.

CREATED BY SDI

POLA

ADVANCED TOOTH
WHITENING SYSTEM

Day or night take-home whitening

Pola Day and Pola Night are safe, convenient and highly effective whitening treatments which are all about choice.

The desired whitening effect can be achieved from as little as 30 minutes twice a day or conveniently applied overnight while your patient sleeps – whatever suits them best. Pola's unique, high water content formulation has a neutral pH and high viscosity designed to protect your patient's gums during treatment.

Flexible choice

from 30 minutes to overnight
with built-in desensitiser

Fluoride-releasing

remineralises the tooth surface
helping to reduce post-operative
sensitivity

High water content

reduces dehydration and
decreases patient sensitivity

High viscosity

easy to apply and remains in the
tray during treatment

Pola Day and Pola Night are available in different strengths. The higher concentration of hydrogen peroxide makes it possible to deliver tooth whitening results in a shorter period of time thanks to the formulation containing more active ingredient.

“A new advanced take home tooth whitening system with led light technology”

From just 20 minutes a day

Whiter teeth in 5 days

Easy to use

Professionally used and recommended

POLA LIGHT

PGS128

Pola Light 6% Hydrogen Peroxide Kit

Enjoy a brighter, more confident smile in 5 days

An advanced tooth whitening system that combines Pola's award-winning whitening formula, with an LED mouthpiece, for a faster whitening treatment. Pola Light is a great and safe way for patients to whiten their teeth in the comfort of their home at a time that suits them.

- No chair time or custom trays required, saving time for both patient and dentist.
- Portable, fully rechargeable for future tooth whitening treatments, and easy to wear with no cord attached to mouthpiece.
- Extra hydration: the unique blend of soothers, conditioners and high water content assist in reducing sensitivity.
- The high viscosity, neutral pH tooth whitening gels ensure the greatest patient comfort in a take home kit. Returning a patient's smile to the whitest natural shade possible.
- Remineralisation to strengthen the teeth and formulated to safely remove long term stains.

Pola Light comes with Pola Day gel

PBI100
Icy Bear Toothpaste

PBI105
Icy Bear Whitening Strips

Icy Bear Dental is a revolutionary dental whitening cosmetic brand developed and designed by celebrity dentist Dr Hanna Kinsella. Founder of Kiln Lane Dental Clinic & Icy Bear Dental, Hanna Kinsella is a well- respected and highly trained dental practitioner and is passionate about both general and cosmetic dentistry.

The world of dentistry is ever evolving and cosmetic dentist and practice owner Dr Kinsella feels passionately about delivering a whiter, healthier smile. Her products have been exclusively manufactured in the UK.

As we know foods such as coffee, tea and red wine can lead to discolouration of the teeth, which in turn has a negative impact on aesthetic appearances.

Dr Hanna Kinsella is proud to say that the Icy Bear brand is palm oil free, SLS free and animal cruelty free and that her products are produced in the UK adhering to strict industry guidelines. The Icy Bear brand is cutting edge on the market and has been developed exclusively by a dental professional.

Testimonial

“Combining aesthetic medicine into my dental career has been one of the most fruitful decisions I have ever made. Being able to address almost every functional and aesthetic concern on the face is an incredibly empowering feeling.”

Dr Sepideh Etemad-Shahidi
Key Opinion Leader, DD Group

Alternate use of Toxins

Toxin injections block certain chemical signals from nerves, mostly signals that cause muscles to contract. The most common use of these injections is to temporarily relax the facial muscles that cause wrinkles in the forehead and around the eyes. Toxin injections are also used to treat conditions that affect how the body functions. Examples include:

Bruxism

Injecting small doses of Toxin directly into the masseter muscle, weakens the muscle enough to stop habitual grinding of the teeth and clenching of the jaw. This significantly relaxes the muscle and reduces the wear and tear on the teeth due to bruxism which if left untreated can lead to fractured tooth or even premature tooth loss.

Cervical dystonia

In this painful condition, your neck muscles contract involuntarily causing your head to twist or turn into an uncomfortable position. Lazy eye. The most common cause of lazy eye is an imbalance in the muscles responsible for positioning the eye.

Muscle contractures

Some neurological conditions, such as cerebral palsy, can cause your limbs to pull in toward your center. In some cases, these contracted muscles can be relaxed with Toxin injections.

Hyperhidrosis

In this condition, excessive sweating occurs even in cool climates with no degree of physical exertion.

Chronic migraine

If you experience migraines more than 15 days a month, Toxin injections can help reduce headache frequency.

Eye twitching

Toxin injections may help relieve contracture or twitching of muscles around the eye.

TOXINS

“DD, Medfx and BFM are the sole preferred distributor for Galderma products within the UK.”

Azzalure®

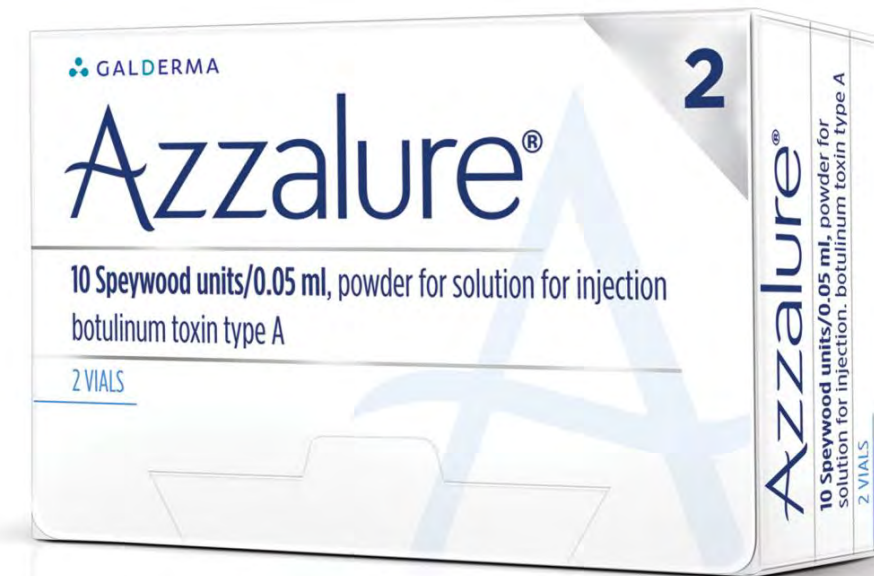

600037

Azzalure Botulinum Type A
2 x 125 units TWIN PACK

Azzalure® is a local muscle relaxant adapted from the botulinum neuromodulator type-A of Dysport® and is specifically designed for use in aesthetic indications.

Azzalure is the aesthetic version of Dysport for the European Union member states.

Azzalure is indicated for the temporary improvement in the appearance of moderate to severe glabellar lines (vertical lines between the eyebrows, or “frown lines”) and lateral canthal lines (crow’s feet lines) seen at maximum smile. In adult patients under 65 years, the severity of these lines has an important improvement in the psychological impact on the patient.

Alluzience®
Botulinum toxin type A

 GALDERMA

“The first ready-to-use
BoNT-A neuromodulator.”

600028

Alluzience 2 x 125 Units
Twin Pack

Botulinum Toxin Type A

Alluzience is indicated for the temporary improvement in the appearance of moderate to severe glabellar lines seen at maximum frown in adult patients under 65 years.

Unlike other botulinum toxin on the market, Alluzience does not require reconstitution before use. This will enable healthcare professionals to avoid complex calculations, allowing for more precision, optimised results and higher patient satisfaction.

Dr Joanna Czuwara, associate professor in the department of dermatology at Warsaw Medical University, said, “The introduction of Alluzience marks a new era in treatment innovation for upper facial lines in Europe. Like many aspects of physical appearance, glabellar lines can have a significant impact on patients’ confidence. Alluzience will allow me to optimise results and deliver patient satisfaction with more precision.”

Alexandre Brennan, head of the global business unit at Galderma, stated, “At Galderma we pride ourselves on developing innovative products that meet today’s needs. We know how advantageous it is for practitioners to have access to a ready-to-use liquid formulation in Alluzience. It’s for this reason that this news is an important milestone for both patients and healthcare professionals.”

BOTOX®
—Cosmetic
onabotulinumtoxinA injection

600010

Botox Botulinum Toxin
Type A Vials - 100 Units

600011

Botox Botulinum Toxin
Type A Vials - 50 Units

Botox botulinum toxin type A for therapeutics and cosmetics.

BOTOX® Cosmetic is the first and only treatment FDA-approved to temporarily make moderate to severe frown lines, crow's feet, and forehead lines look better in adults. So you look like you, only with less noticeable facial lines.

Treatment requires minimal downtime. You can return to your daily routine immediately after you leave your specialist's office. You may begin to notice results within 24 to 48 hours, with full results in 30 days, with results lasting up to 4 months for moderate to severe frown lines.

How it works

Repeated muscle contractions from frowning, squinting, or raising eyebrows cause skin to furrow and fold, gradually resulting in the formation of facial lines. BOTOX® Cosmetic works beneath the surface and temporarily reduces the underlying muscle activity that causes moderate to severe frown lines, crow's feet and forehead lines in adults – to help them look better.

Only BOTOX® Cosmetic is backed by more than 16 years of published studies. It uses a unique manufacturing process, and its potency is measured in units that cannot be compared to any other product. This is why there is no such thing as "generic" BOTOX® Cosmetic.

Dysport®
(abobotulinumtoxinA)

Nonsurgical wrinkle treatment with quick recovery

An injectable form of a botulinum neurotoxin type A product, which is a substance derived from Clostridium bacteria producing botulinum toxin type A (BoNT-A) that inhibits the effective transmission of nerve impulses and thereby reduces muscular contractions. Dysport reduces the appearance of lines that affect the glabella, these lines extend upward between the eyebrows toward the forehead. Glabella lines are especially noticeable when you frown or squint. Over time, glabella lines can become more prominent during times of relaxation, too.

600020

Dysport, 2 x 500

MERZ AESTHETICS®

Botulinum toxin type A free from complexing proteins

Bocouture is botulinum toxin type A free from complexing proteins, indicated for the temporary improvement in the appearance of moderate to severe vertical lines between the eyebrows seen at frown (glabellar frown lines) in adults below 65 years when the severity of these lines has an important psychological impact for the patient. Bocouture can be stored at room temperature below 25°C for up to 3 years prior to reconstitution. Do not store the unopened vial above 25°C.

FILLERS & SKINBOOSTERS

“Create a signature
look with *Restylane*”

REFINE. REJUVENATE. ENHANCE.

A complete filler portfolio you can rely on to create the natural elegance your patients desire. Restylane enables you to tailor your patients treatment based on tissue quality, desired outcome, and treatment area, by bringing together two unique technologies (OBT and NASHA) for the broadest range of gel textures. Restylane has grown to become the world's most diverse range of fillers to answer the evolving needs of you and your patients.

RESTYLANE™

600160

Restylane Classic
1ml D16
without Lidocaine

600157

Restylane Classic
0.5ml D16
with Lidocaine

600207

Restylane Classic
1ml D16
with Lidocaine

Common treated areas:

Tear trough
Upper Lip lines
Nasolabial folds
Oral Commissures
Lips
Marionette lines

Restylane is intended to be used for facial tissue augmentation. It is recommended to be used for the correction of wrinkles and for lip enhancement. It should be injected into the middle part of the dermis layer or in the submucosal layer of the lip. For facial areas with limited soft tissue support and soft tissue cover, e.g. the periorbital region, injection into the subcutaneous fatty tissue or supraperiosteal administration are recommended. The addition of lidocaine provides a pain relieving effect during treatment.

RESTYLANE VOLYME™

600208

Restylane Volyme 1ml

Common treated areas:

Temples
Cheeks
Nasolabial folds
Jawline
Chin

Restylane Volyme is intended to replenish the volume of facial tissues. It is recommended to be used for the correction of facial volume, for instance cheeks and chin. Depending on the area to be treated and the tissue support, the product should be injected into the supraperiostic zone or subcutis. The addition of lidocaine provides a pain relieving effect during treatment.

RESTYLANE REFYNE™

600209

Restylane Refyne 1ml

Common treated areas:

Tear trough
Upper Lip lines
Nasolabial folds
Marionette lines
Lips

Restylane Refyne is intended to augment the volume of facial tissues. It is recommended to be used for correction of moderate wrinkles, or to redefine the shape of the lips, cheeks or tear troughs. Depending on the area to be treated and the tissue support, the product should be injected in the mid- to deep-dermis, submucosal layer of the lips, subcutis or supraperiostic zone. The addition of lidocaine provides a pain relieving effect during treatment.

RESTYLANE FYNESSE™

600210

Restylane Fynesse 1ml

Common treated areas:

Periorbital lines

Restylane Fynesse is intended to augment the volume of facial tissue such as peri-oral lines and peri-orbital lines around the eyes (crow's feet). It is recommended to be used for correction of superficial wrinkles. It should be injected into the superficial dermis.

RESTYLANE DEFYNE™

600212

Restylane Defyne 1ml

Common treated areas:

Tear trough
Cheeks
Nasolabial folds
Marionette lines
Jawline
Chin

Restylane Defyne is intended to augment the volume of facial tissues. It is recommended to be used for correction of severe wrinkles, or tear troughs to redefine the shape of the lips, cheeks or tear troughs. Depending on the area to be treated and the tissue support, the product should be injected in the mid- to deep-dermis, submucosal layer of the lips, subcutis or supraperiostic zone. The addition of lidocaine provides again relieving effect during treatment.

RESTYLANE KYSSE™

600213

Restylane Kysse 1ml

Common treated areas:

Lips

Restylane Kysse is intended to restore or augment the volume of the lips. It should be injected into the submucosal layer of the lip. The addition of lidocaine provides a pain relieving effect during treatment.

RESTYLANE LYFT™

600150

Restylane Lyft 1ml
without Lidocaine

600211

Restylane Lyft Lidocaine 1ml
with Lidocaine

Common treated areas:

Tear trough
Cheeks
Nasolabial folds
Oral Commissures
Marionette lines
Jawline
Chin

Restylane Lyft is intended to be used for facial tissue augmentation. It is recommended to be used for shaping the contours of the face, the correction of folds and for lip enhancement. It should be injected into the deep layer of the dermis and/or the surface layer of the subcutis or in the submucosal layer of the lip. For facial areas with limited soft tissue support and soft tissue cover, e.g. the periorbital region, injection into the subcutaneous fatty tissue or supraperiosteal administration are recommended.

RESTYLANE EYELIGHT™

600214

Restylane Eyelight 0.5ml
with Lidocaine

Common treated areas:

Tear trough

Restylane Eyelight is a targeted hyaluronic acid injectable filler that reduces the grooves caused by a lack of volume in the under-eye area. A small amount of Restylane Eyelight is placed under the eye to fill the groove. With the groove filled and the volume replaced, shadows and dark circles under the eyes will decrease, giving you a refreshed and less tired appearance.

Restylane® SKINBOOSTERS™

Let their individuality shine with the dewy, strobe-like effects of Restylane® Skinboosters.™

When we feel good about our skin, we feel good about ourselves, but over time our skin can lose its natural radiance. Now it is possible to boost your skin from within.

Restylane® SKINBOOSTERS™ infuse a thin layer of micro droplets of hyaluronic acid beneath the skin surface, where it draws water and provides long-term deep hydration. You will get a refreshed and radiant look that lasts.

Why Restylane® SKINBOOSTERS™?

Hyaluronic acid is a natural component of your skin that keeps it hydrated and soft. With age, or due to a harsh environment, the hyaluronic acid content in your skin may decrease, and your skin may lose some of its elasticity and hydration.

Restylane® SKINBOOSTERS™ restores the natural composition of your skin. It boosts skin elasticity and you will notice a reduction of skin roughness. Your skin becomes smooth and hydrated for a refreshed and healthy look.

SKINBOOSTERS VITAL™ Face and Hands.

improve skin structure and the elasticity of the skin. It should be injected in the dermal layer of the skin, preferably in the deeper part of dermis. The addition of lidocaine provides a pain relieving effect during treatment.

SKINBOOSTERS VITAL™ Neck and décolletage.

Restylane Vital is intended to restore skin hydrobalance, improve skin structure and the elasticity of the skin. It should be injected in the dermal layer of the skin. The addition of lidocaine provides a pain relieving effect during treatment.

SUNEKOS

Feel.. Don't Fill

Turn back the clock with the revolutionary new skin treatment.

Working differently to fillers SunekOS stimulates your own collagen and elastin to restore your natural beauty. Improve wrinkles and the signs of ageing and be the new you with this scientifically proven game changing new treatment.

SunekOS injectable treatment stimulates the production of new collagen and elastin, to help rebuild and rejuvenate your skin. Our unique formula of two essential ingredients Hyaluronic Acid and Amino Acids stimulate collagen and elastin fibres, enabling cellular matrix regeneration (ECM).

Where to use SunekOS?

- **Eyes** - Remove dark circles and feel refreshed
- **Face** - Restore your natural beauty and feel your best
- **Neck** - Rejuvenate your skin and feel forever you
- **Body** - Treat stretchmarks and feel happy in your skin.
- **Decolletage** - Feel fresher and restore your natural look.
- **Back of hands** - Feel confident and restore firmness and elasticity.
- **Acne scarring** - Feel positive with natural radiant looking skin.

Aftercare for Sunekos treatment on page 107/108

600238

Sunekos Performa, 2 x treatments

For correction of imperfections and defects in the skin tissues. A filler for skin imperfections of mild to moderate entity, injected in the skin tissue to make up for the intracellular matrix and increase the volume in anatomically depressed skin, favouring the normalisation of imperfections

600241

Sunekos I200, 1 Vial

The Sunekos I200 product is characterized by the presence, as the name says, of a higher molecular weight hyaluronic acid and that allows us, in the case of particularly emptied faces, to create that volume that is needed, called "cushion", as a base for the product Sunekos 200.

600239

Sunekos Body, 1 Vial

Treat the skin laxity of arms, inner thigh, knees and abdomen. It has changed the type and concentration of the Hyaluronic Acid (low density), and also its ratio vs AA. This is to adapt to the different behaviour of these parts of the body that has a different density and mainly affected by skin laxity.

*“what others don’t
know about me...”*

Did you know we can increase your revenues by bringing Sunekos clients to you through our clinic finder follow the QR code or email aesthetics@ddgroup.com

Sculptra[®] aesthetic

“A unique aesthetic treatment due to its ability to stimulate collagen.”

The treatment that activates your skin's natural power to revitalize collagen production for a more youthful appearance. Sculptra is a unique A&C treatment due to its ability to stimulate collagen.

Beautiful skin is a journey. But as time goes on, it can be harder and harder to keep up. As you age, collagen production diminishes, and your skin doesn't have the same resiliency and fullness it did in the past. Discover Sculptra – the treatment that activates your skin's natural power to revitalize collagen production for a more youthful appearance. Sculptra is a unique A&C treatment due to its ability to stimulate collagen.

600600
Sculptra - 2 vials

- An injectable treatment to smooth facial wrinkles and restore volume and contour to the face. Sculptra, or poly-L-lactic acid, works by stimulating the body's collagen to smooth lines and wrinkles and restore a youthful appearance. The natural looking results from Sculptra are noticeable after approximately six weeks and can last for up to two years.
- Sculptra was first approved 1999 in Europe for filling small facial deficits and it is currently available in more than 40 countries globally.
- Sculptra consist of Poly- L-Lactic Acid, which is a synthetic polymer that has been used in human body since 1960 and as medical suture material from 1970.

JUVEDERM® is the world's leading hyaluronic acid or HA facial filler. HA binds to water in your skin which may smooth lines and wrinkles, add volume and enhance or define facial features.

JUVEDERM® facial fillers have the ability to integrate with your own facial tissue to get natural-looking results. Each JUVEDERM® facial filler is designed for a particular purpose, whether it's to treat fine or deep lines/folds, restore facial volume for a lifting effect, or reshape and redefine the lips.

Allergan has over 60 years of experience in stringent product manufacturing¹⁰. The JUVEDERM® range of facial fillers is made using cross-linked technology to help you achieve natural-looking and long-lasting results (up to 24 months, dependent on the facial filler used and the area treated).

ULTRA RANGE.

The Juvéderm Ultra range of products use a specially formulated type of hyaluronic acid (HA) that exists naturally in the skin. It's a natural, biodegradable gel that flows easily and smoothly into the skin, instantly filling out troublesome lines leaving a smooth and natural look and feel.

Allergan Aesthetics

JUVEDÉRM ULTRA 2

600255

Juvederm Ultra 2, 2 x 0.5ml
with Lidocaine

Common treated areas:

Lips
Eyes

Juvederm® Ultra 2 is a dermal filler based on hyaluronic acid with lidocaine. The preparation is used to remove fine lines and superficial wrinkles, usually around the lips and eyes.

JUVEDÉRM ULTRA 3

600262

Juvederm Ultra 3, 2 x 1ml
with Lidocaine

Common treated areas:

Nasolabial folds
Marionette lines
Lips

Juvéderm Ultra 3 is an injectable hyaluronic acid based dermal filler used to smooth medium and deep wrinkles like those between the nose and corner of the mouth.

JUVEDÉRM ULTRA 4

600269

Juvederm Ultra 4, 2 x 1ml
with Lidocaine

Common treated areas:

Nasolabial folds
Cheekbones
Chin
Lips

Juvéderm Ultra 4 is an injectable hyaluronic acid based dermal filler that has an even greater volumising effect and is used to fill deep depressions of the skin via injections, as well as for lip enhancement and cheekbone augmentation.

Juvederm your way

JUVEDÉRM ULTRA *Smile*

600271

Juvederm Ultra 2, 2 x 0.5ml
with Lidocaine

Common treated areas:

Lips

Juvederm Ultra Smile is an injectable hyaluronic acid based dermal filler with lidocaine dedicated to the lips and mouth area. It is used to enhance lip volume, redefine lip shape, treat vertical lip lines and depressions at the corners of the mouth.

Smile

JUVEDÉRM VOLIFT

An adaptable product which can be used to rejuvenate facial areas by restoring volume into medium or deep lines or adding subtle volume to facial contours. The results are particularly longer lasting, generally lasting up to 15 months.

JUVEDÉRM VOLIFT

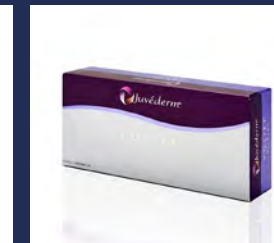

Retouch

Juvederm Volift Retouch - used for touch-up treatments, recommended 2 weeks after initial treatment

Juvederm Volift 2 x 1 ml
with Lidocaine

600279

Juvederm Volift Retouch
Dermal Filler 2 x 0.55ml

JUVEDÉRM HYDRATE

Juvederm Hydrate is injectable hyaluronic acid that is designed to improve skin hydration and elasticity.

600273

Juvederm Hydrate
1 x 1ml

JUVEDÉRM VOLUMA

600274

Juvederm Voluma, 2 x 1 ml
with Lidocaine

Common treated areas:

Cheeks
Chin

Juvederm Voluma is an injectable hyaluronic acid volumiser that re-contours and adds volume to chin, cheeks, and cheekbones that have become hollow or thin due to weight loss or age-related facial fat loss.

The cross-linking enables a low concentration of Hyaluronic acid to provide effective natural long-lasting results, alongside minimal swelling and bruising. A 30 minute treatment sessions can give you effects lasting for up to 15 months.

JUVEDÉRM VOLBELLA

600278

Juvederm Volbella, 2 x 1 ml
with Lidocaine

Common treated areas:

Lips
Perioral lines
Undereye hollows

Juvederm Volbella with Lidocaine contains biocompatible hyaluronic acid which is an injectable filler that provides instant results that are natural. Volbella is the perfect product to choose for small fine lines and subtle enhancement of the lips. The smaller particle size allows for the correction of these fine areas without the worry that your lips will get bulky or too puffy. Volbella was developed specifically for the lips and mouth area with results lasting up to 12 months.

“Plump and hydrate skin, smoothing out roughness and evening out depressions.”

Benefits at a glance

Average recommendations suggest that a patient can go back to normal activities the very next day. Volite also contains lidocaine, a substance that assists the patients comfort throughout the treatment. Finally, it smoothes the skin, reducing the appearance of fine lines.

- Hyaluronic acid treatment
- Hydrates, smooths and increases elasticity of skin
- Up to 100 injections in a typical treatment
- Available for face, neck, décolletage and hands
- Suitable for all ages and skin types

JUVEDÉRM VOLITE

600268

Juvederm Volite, 2 x 1 ml
with Lidocaine

Clinically proven dermal hydration.

Volite is an innovative injectable treatment designed to improve skin quality for up to 9 months. This is not a dermal filler, it's a skin conditioning Hyaluronic acid (HA) gel. Volite is injected into the middle layers of the dermis across many sites to nourish it from the inside out. Volite is suitable for all ages and skin types. Juvederm Volite has a triple action effect. It hydrates the skin, because of the high water-binding capacity of HA. It increases elasticity because HA also stimulates collagen production.

Common treated areas:

Face
Neck
Décolletage
Hands

Allergan Aesthetics

PROFILO®

One of the highest concentrations of hyaluronic acid on the market.

The first of its kind, Profhilo® is a revolutionary 'beneath the skin' hyaluronic acid moisturising treatment, made with the patented NAHYCO® technology. This results in a unique hyaluronic acid injectable gel, which has a prolonged stimulating activity on the dermal cells. When injected into skin, Profhilo® stimulates the skin cell receptors to counteract skin laxity and improve and restore firmness of the skin.

One of the highest concentrations of hyaluronic acid on the market, Profhilo® not only boosts and hydrates the skin, but also remodels ageing and sagging tissue. The most common areas of treatment include the face and neck and can also be used for the décolletage, hands, arms, knees and abdomen area where it would effectively treat skin laxity. The treatment is suitable for men and women as well as offering skin benefits for patients of all ages.

How Does Profhilo® Work?

Ultra-pure hyaluronic acid is precisely injected into the area being treated. Unlike wrinkle reducing and dermal filler treatments, Profhilo® stimulates collagen and elastin, attracting water in the deeper layers of the skin. As a stabilised product, the activity on dermal cells will last longer than that of a non-stabilised gel. During this time the stimulation of four different types of collagen and elastin takes place by slow release of hyaluronic acid.

The stimulation results in significant tissue improvement. Therefore we cannot say that Profhilo® is a skin booster as it also has a significant tightening / lifting effect on the tissue.

PROFILO®

B O D Y

A new approach to Skin laxity and body care

PROFILO® BODY has been designed for TISSUE REMODELLING and IMPROVEMENT IN SKIN LAXITY of the inner arm and the abdomen.

Only 10 points of injection for each area are needed;

It is a non-invasive treatment, so it reduces the possibility of bruises and swelling, while maximising the diffusion of the product in the tissues;

It does not require any prior preparation.

MERZ AESTHETICS®

BELOTERO®

The filler you'll love.

An innovative hyaluronic acid dermal filler range.

The BELOTERO® family of fillers is a tailored portfolio for you that can be used to fill wrinkles, restore facial volume and hydrate skin in a holistic approach that respects your individuality.

Offering a comprehensive range of hyaluronic acid fillers that deliver predictable and natural-looking results which responds to the individual needs of each patient. Take a closer look at the BELOTERO® brand and its entire product range to discover the right treatment for your patient's needs.

WHY BELOTERO®?

The BELOTERO® portfolio has seven products that can be used in combination for facial rejuvenation. Each product has its own characteristics and intended use.

The BELOTERO® range is versatile enough to address multiple areas of concern including lip volumisation, softening fine lines, smoothing contours and restoring structure.

Some of the benefits of BELOTERO® are:

- Natural-looking results
- Predictable and harmonious results for high patient satisfaction and trust
- Established safety profile

MODE OF ACTION

The BELOTERO® difference is the combination of Cohesive Polydensified Matrix® (CPM®) technology for a lasting effect into the skin, while respecting facial movement and natural-looking results.

BELOTERO®'s specific manufacturing process known as CPM® technology, results in different densities of HA, creating a combination of high and low-density zones. This allows the gel to 'mimic' tissue behaviour, to ensure optimal integration of the gel into the surrounding tissue. For you, this means that BELOTERO® integrates seamlessly into your skin and stays intact for lasting effect.

BELOTERO VOLUME

600056

Belotero Volume 2 x 1 ml
with Lidocaine

Restoration of facial
volume in:

Cheers & cheekbones
Chin
Facial volume loss
Temples
Jawline

Belotero Volume models and restores facial volume due to its tailored plasticity. Based on its balanced cohesivity, the product is long lasting and with no migration. Belotero Volume can be injected into different areas to restore facial volume, e.g. cheekbones, cheeks, and temples.

BELOTERO BALANCE

600050

Belotero Balance 1 ml
without Lidocaine

600054

Belotero Balance 1 ml
with Lidocaine

Correction of moderate lines,
such as:

Nasolabial folds
Moderate perioral lines
Lip contouring
Tear trough
Marionette lines
Perioral lines

Belotero Balance is your choice for the correction of medium to deep lines such as perioral lines. It seamlessly integrates into the skin and can also be used for the enhancement of the vermillion border.

BELOTERO INTENSE

600052

Belotero Intense 1 ml
without Lidocaine

600055

Belotero Intense 1 ml
with Lidocaine

Correction of deeper lines,
such as:

Deep nasolabial folds
Lip volume
Lip contours
Marionette lines
Oral commissures
Cupid's bow

Belotero Intense provides optimal filling capacity for predictable, natural looking results while maintaining excellent tissue integration to minimise lumps and bumps.

BELOTERO SOFT

600051

Belotero Soft 1 ml
without Lidocaine

600053

Belotero Soft 1 ml
with Lidocaine

Correction of fine lines,
such as:

Fine lines around the mouth
Crows feet
Perioral lines

Belotero Soft is optimised for fine line correction and deep rehydration due to its excellent cohesivity and its water binding capacity. Belotero Soft is indicated for fine lines such as crow's feet and perioral lines.

Natural Results

BELOTERO+ LIPS

600057

Belotero+ Lips
Shape 0.6ml

For lip augmentation
and enhancing the
upper and lower lips.

600058

Belotero+ Lips
Contour 0.6ml

To restore the outline
of the lips for a more
youthful appearance.

Just like lipstick and lip liner complement each other, defining, enhancing or volumising lips often requires more than one approach.

BELOTERO® Lips Shape and BELOTERO® Lips Contour are HA dermal fillers with patented CPM® technology for seamless integration into the skin. They are ideal to add or restore volume to thin lips and to sculpt and define lip contours to full lips for natural-looking results.

Hyaluronic Acid Dermal Fillers

Hyaluronic acid (HA) is our skin's natural moisturiser, it binds to water which moisturises the skin and provides tightness. Over time, its natural production decreases and skin loses its elasticity and firmness. Hyaluronic acid (HA) dermal fillers can improve lip volume and correct lip contours.

HA fillers integrate so smoothly and evenly into your skin that they feel completely natural, just like your own tissue.

This is especially important in areas like the lips, where you want to see the results but not necessarily feel anything different. BELOTERO® has an established safety profile.

“Full, well-defined lips are a signature of youth and beauty.”

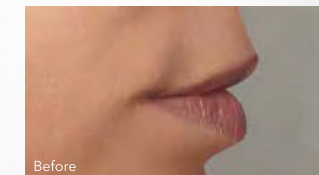

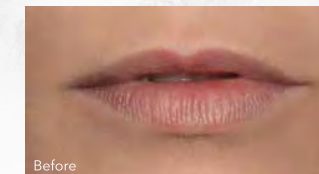

Empower your patients to express themselves with confidence and show their best self.

Take lip enhancement to a new level.

- The patented Cohesive Polydensified Matrix® (CPM®) Technology produces a polydensified gel, with high and low density zones, which enables BELOTERO® to seamlessly integrate within the dermis and stay intact for a lasting effect.
- BELOTERO® integrates optimally and is resilient in areas of high muscular activity. Results are smooth surface contours which look natural at rest or when animated.
- CPM® and rheologic tailoring reduce palpability and the risk of visibility which means that patients are less likely to feel BELOTERO® in the skin, with no reported Tyndall effect.
- BELOTERO® demonstrates a lower risk of inflammation compared to other HA fillers, therefore it is more compatible in the skin.

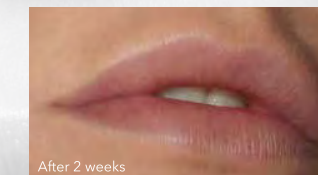

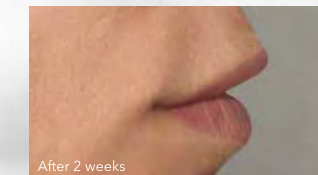

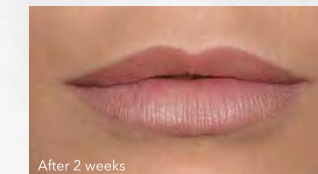

Before & After

Patient:
31-year old female

Upper Lip: 0.24 ml BELOTERO® Lips Contour
0.3 ml BELOTERO® Lips Shape

Lower Lip: 0.3 ml BELOTERO® Lips Contour

RADIESSE®

INJECTABLES

Long-Lasting Immediate Lift.

Radiesse® is the only dermal filler that provides an instant lift and stimulates the production of collagen for long-lasting results. Radiesse is your choice for versatile filling, vertical lifting and contouring, and skin rejuvenation.

Replenish Volume. Restore Collagen. Refresh You.

Ideal wrinkle reduction is achieved by replenishing your skin's lost volume. Upon injection, Radiesse® Dermal Filler immediately provides the volume and lift required to diminish the signs of aging with a biodegradable gel and calcium-based microspheres. What's unique about Radiesse is that it acts as a scaffold under the skin, stimulating and providing a structure where your own natural collagen can grow. This process continues for several months, extending the initial effects of Radiesse. Best of all, the natural-looking results are clinically proven to last a year or more in many patients. That's why more cosmetic surgeons, dermatologists, and other medical professionals are choosing Radiesse to achieve long-lasting facial contouring and hand rejuvenation.

Radiesse is the ideal for smoothing out laugh lines (nasolabial folds), marionette lines, lifting the corners of the mouth and pre-jowl folds, as well as enhancing the contours of the cheek, chin and jawline. Radiesse can also be used to restore volume loss in the back of the hands.

Benefits of Radiesse

- Replenishes lost volume and stimulates the production of your own natural collagen.
- Clinically proven to last a year or more in many patients.
- Men can also choose a treatment strategy with Radiesse which leads to natural looking results without compromising masculinity.

MERZ AESTHETICS®

The unique composition of Radiesse provides immediate visual improvement common with other injectables, along with the benefit of long-lasting results. Radiesse is made of very tiny smooth calcium hydroxylapatite (CaHA) microspheres which form a scaffold through which your body's own collagen grows, and this produces the desired long-term effect.

For severe lines and folds and other volumising and contouring procedures.

TEOXANE

TEOSYAL

Introducing Dynamic Aesthetics.

TEOSYAL® is a range of injectable hyaluronic acid-based dermal fillers designed to treat wrinkles, give volume to the face and improve skin quality. Created and manufactured under optimal safety and high-quality requirements in their Geneva laboratories, this award-winning line of dermal fillers is made of 100% non-animal origin and biodegradable hyaluronic acid that is highly biocompatible, offering patients immediate and long-lasting results.

The full TEOSYAL® range of products consists of unique dermal fillers with differing gel densities and unique properties making each one specific to treating different areas of the face and achieve different results, from prevention of fine lines and/or wrinkles to remodeling the contour of the face.

The Dynamics

RHA range

The TEOSYAL RHA® products were created by TEOXANE Laboratories according to a patented process, making it possible to meet the specific requirements of mobile facial areas. This technology preserves the natural characteristics of the hyaluronic acid molecules to obtain gels with high purity, close to the natural content of hyaluronic acid in the skin.

The Volumisers

TEOXANE Laboratories develop and produce different ranges of hyaluronic acid based dermal fillers, designed to compensate volume lost during the ageing process.

PURESENSE RANGE

600813 / 600819

Teosyal PureSense
Redensity I

2 x 1ml / 3ml

Treating the skin of the face, neck and neckline by performing microinjections of hyaluronic acid containing amino acids, antioxidants, vitamins and minerals; hydrating the skin and restoring its ability to reflect light.

600814

Teosyal PureSense
Redensity II

2 x 1ml

Dedicated to the treatment of the peri-orbital area and fine wrinkles for a natural, safe and long-lasting correction. Its viscoelasticity is specifically designed to 'coat' the eye circle region.

600809

Teosyal PureSense
Global Action

2 x 1ml

Treatment for filling linear facial wrinkles and skin breaks, such as slight or moderately marked nasolabial folds, lines around the mouth and lines between the eyebrows.

600810

Teosyal PureSense
Deep Lines

2 x 1ml

Treatment to fill deep facial wrinkles and deep skin breaks, and to enhance the shape of the face.

600807

Teosyal PureSense
Ultimate

3ml

Designed to provide a volume solution for larger-scale facial remodelling, offering the prospect of achieving a complete non-surgical facelift for some patients. Supplied with a 23G needle.

600812

Teosyal PureSense
Ultra Deep

2 x 1.2ml

Treatment to augment the cheeks, cheekbones and facial contours, to correct mild ptosis and to fill deep facial wrinkles on thick skin areas.

600811

Teosyal PureSense
Kiss

2 x 1ml

Harmonisation of the lip contour and volume.

TEOSYAL TOUCH UP

Suitable for touch-up sessions when in the process of completing Teosyal Global Action treatments.

600817

Teosyal Touch Up

2 x 0.5ml

TEOSYAL PEN

A unique electronic dispenser specifically designed for hyaluronic acid filler injections

Includes battery, closing button and a pack of 25 syringe holders for the Pen

ART FILLER®

BY FILLMED

40 Years of aesthetic medicine, correction and procedures.

Laboratoires FILLMED, with its renowned expertise and continuous research into finding anti-ageing solutions, has designed and developed treatment products for aesthetic medical professionals since 1978, using hyaluronic acid and other high-performance ingredients.

The ART FILLER® collection was originally launched in 2016, there are five products within the collection: Universal, Fine Lines, Volume and the LIP MENU (ART FILLER® LIPS SOFT & ART FILLER® LIPS). Each is specifically designed to achieve a different treatment objective, whilst allowing a high degree of versatility and precision.

Haute sculpture aesthetic correction

The ART FILLER® range has been developed using one of FILLMED's very latest and exclusive innovations – TRI-HYAL® TECHNOLOGY. The gels are made using non-animal origin hyaluronic acid and are highly malleable, making them designed for smoothing wrinkles, sculpting and adding volume.

Each individual product within the range has been created with a specific treatment objective in mind. Fluidity, flexibility and precision are the bywords of this groundbreaking palette of products.

Respecting the individuality of each patient is one of the main drivers behind the development of all their products.

Art and science of aesthetic medicine

Using hyaluronic acid injections to fill in wrinkles, plump and contour is nothing short of an art. To find the perfect balance between an aesthetic and harmonious result takes both precision and skill and can be compared to an artist who uses creative flair to produce a beautiful work of art. Not only does your practitioner need to have an eye for the aesthetic when it comes to treating your face but also the best tools at hand to achieve the desired result.

Rather like a portrait, your personality and natural look should shine through. The ART FILLER® collection is to the practitioner what the palette is to an artist: a way to express his/her art, whilst respecting your individuality.

Correct with ART Filler

Smooth out superficial-to-deep wrinkles, plump up the lips and create/restore the volumes and contours of the face.

ART FILLER® gives natural results, restoring volume, correcting, rejuvenating wrinkles and enhancing beauty. ART FILLER® boasts longevity, ease of use, soft natural results, loved by aestheticians all over the world.

With ART FILLER® it is possible to offer a unique and tailored approach to your patients, by combining with Peels, NCTF, Nano Soft and more.

FILLMED ART FILLER LIPS

600702

FILLMED Art Filler Lips
2 x 1ml

An easy-to-shape texture with volumising potential. For correction that fits the dynamic area of the lips.

Lip correction and volume for luscious lips

- Embellish or correct the volume of the red lip.
- Give more projection for a plump mouth.
- Fill in the pronounced nasolabial folds and deep lip wrinkles.

600694

FILLMED Art Filler Lips Soft
1ml

Used for the pink lip for natural enhancement. It can also be used in the boarder and in the white lip.

Lip contour & soft volume for natural fullness

- Restore lost volume to the red lips.
- Improve the white lip/red lip contour.
- Smooth the peri oral zone and the lip wrinkles.

FILLMED
LABORATOIRES

600701

FILLMED Art Filler Fine Lines
2 x 1ml

A soft texture with high smoothing potential for spreading capacity. For fine and superficial wrinkles.

Superficial wrinkles: cheeks, upper lip, crow's feet and forehead wrinkles.

600703

FILLMED Art Filler Universal
2 x 1ml

Designed to be used on medium to deep wrinkles: nasolabial folds, marionette lines.

600704

FILLMED Art Filler Volume
2 x 1.2ml

An easy-to-shape texture with strong volumising potential. For restoration of the face's volumes.

Volume creation and restoration: Mid-face, jawline, temples.

Get started with PERFECTHA.

Perfectha has been helping women perfect their look and express themselves since 2007, with more than 3,8 million syringes sold in over 50 countries around the world.

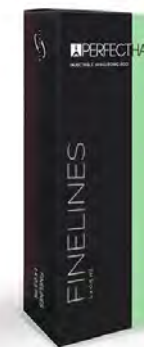

And now, the Perfectha family is complete. With 0.30% pain-reducing Lidocaine in the formula, Perfectha Lidocaine means you can give your patients long-lasting, natural-looking results – with the added comfort and convenience of Lidocaine.

The line of resorbable hyaluronic acid (HA) gel implants are intended for reconstructive purposes in the treatment, for instance, of facial lipoatrophy, or morphological asymmetry associated with the aging process or other underlying conditions. Perfectha is for intradermal and subcutaneous application and is implanted in the areas of the face and hands to fill skin depressions and also for the augmentation of tissue volume.

Perfectha is manufactured 100% in France by Sinclair France SAS in its laboratory specialised in the research, development and manufacturing of Hyaluronic Acid (HA) fillers, and ISO 13485 certified since 2007.

“The freedom
to be you.”

Perfectha FineLines
Filler 0.5ml

Use it to enhance

- Gently erase scars like acne marks

Use it to perfect

- Light facial lines
- Crows feet
- Perioral lines

600621
Perfectha Complement
Filler 0.8ml

Use it to enhance

- Fill superficial skin depressions
- Reduce fine wrinkles

Use it to perfect

- Periorbital wrinkles
- Perioral wrinkles
- Forehead wrinkles

600622
Perfectha Derm Filler
1ml

Use it to enhance

- Boost your lip volume
- Change your lip contour

Use it to perfect

- Frown lines
- ‘11’ eyebrows lines

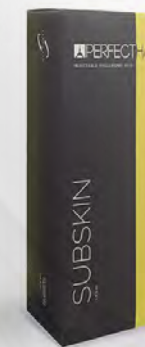

600623
Perfectha Deep Filler
1ml

Use it to enhance

- Add cheekbone structure
- Augment the chin and change the jawline

Use it to perfect

- Smile lines
- Nasolabial lines
- Marionette lines

600624
Perfectha Subskin
3 x 1ml

Use it to enhance

- Plump, boost and add volume
- Refine your facial contours
- Sharpen and shape your cheekbones
- Create your most perfect chin

Use it to perfect

- Change the shape of the nose bridge
- Restore earliest signs of ageing on your hands

Advance your beauty goals.

A safe, long-lasting improvement in skin density, firmness, elasticity, tone and texture. Discover how ELLANSÉ has advanced the beauty goals of men and women.

ELLANSÉ is a dual-action dermal filler that does so much more than just correcting lines and folds. It works fast to give visible results – then it gets to work deep under the skin to tackle the real causes of facial ageing.

How ELLANSÉ is different

Polycaprolactone. The name you won't want to forget. This absorbable and biodegradable material, is the basis of the ELLANSÉ filler, beloved by celebrities for achieving the most subtle and long-lasting results.

A fast and noticeable improvement in skin quality

Collagen biostimulating products not only deliver rapid results, but also improve the quality of the skin in the medium and long term, so their effect is sustained.

Ideal for deep volumes and rejuvenation

ELLANSÉ is made of polycaprolactone that belongs to the class of biodegradable aliphatic (open chain) polyester designed for medicine and perfect to treat wrinkles in the midface area and around the mouth when used in dermal filler. ELLANSÉ is ideal for deep volume, and also as a simple collagen stimulator to rejuvenate the skin without adding volume.

Incorporating Aesthetics into your Dental Practice

Dr Priya Gaiind
Director of Clinical at DD

“ I could use Dental Aesthetics to improve patients’ overall wellbeing and ultimately change their lives. ”

“ Over the years I realised the stresses of dentistry were affecting my physical and mental health. I have always had a keen interest in dental aesthetics by providing teeth whitening, smile design and short-term orthodontics routinely to my patients. Working in a hospital is an entirely different experience and at times can be disheartening to see patients with a poor quality of life from something we consider trivial like teeth grinding. It was then I realised I could use dental aesthetics to improve patients’ overall wellbeing and ultimately change their lives.

I started offering anti-wrinkle treatments, as an extension of what I already offer in my practice for treatments for TMJD,

which some of my patients had invested a lot of time and money into. Working with different toxins has improved my patients’ oral health and protected their teeth from chipping, pain and tooth loss.

This has improved my career satisfaction, reduced my back pain, improved the patient relationship and most importantly the perception of visiting the dentist. My Patients want to attend for different types of treatments now, and I have now extended my aesthetic offering as a result.

What I now provide is something that every dentist can provide.

”

Priya works in both General Practice and Hospital as a Dentist as well as being our **Director of Clinical at DD**. Priya is a published author and a well known figure in UK Dentistry.

SLIMMING AND FAT REDUCTION

*“For the successful,
non-invasive, treatment of cellulite.”*

SUNEKOS CELL

600237
Sunekos Cell, 1 vial

To counteract acidosis and to restore the extracellular matrix.
Containing Carbonate and Biocarbonate salts for neutralisation of typical acidosis in latent inflammation that characterises both the early and late stages of low molecular disease.
Sunekos Cell has low molecular weight hyaluronic acid (HA), meaning a 200kD targeted stimulating action on fibroblasts, through binding with specific receptors for HA fragments.
Sunekos Cell also has Amino Acids for optimal neosynthesis of collagen and elastin.

SUNEKOS BODY

600239
Sunekos Body, 1 vial

To regenerate the ECM counteracting the body's skin laxity.
Sunekos Body is composed of 10ml of low density HA+ AA (HY6AA Formula) in a specifically balanced solution adapting to the electrolyte composition of the Interstitial Fluids of the body. Interstitial fluid/electrolyte composition is different between face and body. This means that the HY6AA Formula has to be adapted considering the different electrolyte composition, in order to let the AA enter the cell. Sunekos Body has been developed specifically for the areas of arms, thighs and belly. It is indicated to counteract skin laxity and stretchmarks. The mix and density of each component has been balanced to adapt to the IF electrolytic composition of body areas.

Saxenda®

Managing a long-term disease like obesity requires more than willpower alone. The Saxenda Injection is used as an aid for people needing to lose weight. Containing liraglutide, the injection reduces the patients appetite and assists with weight loss.

How Saxenda® Works

Saxenda® addresses one of your body's natural responses to weight loss. Your body naturally produces an appetite hormone known as glucagon-like-peptide (GLP-1) that helps to regulate your hunger. Saxenda® works like GLP-1 by regulating your appetite, which can lead to eating fewer calories and losing weight.

Benefits of Saxenda®

You may have lost weight once or many times in the past. But keeping the weight off proved to be difficult. Saxenda® helps adults lose weight and keep it off, Saxenda® should be used with a reduced calorie diet and increased physical activity.

COSMEDICAL

DESOFACE

650511
Desoface 0,50%, 5 x 10ml

Desoface is a fat dissolving solution that targets the cell membrane of the adipocytes and improves the “double chin”.

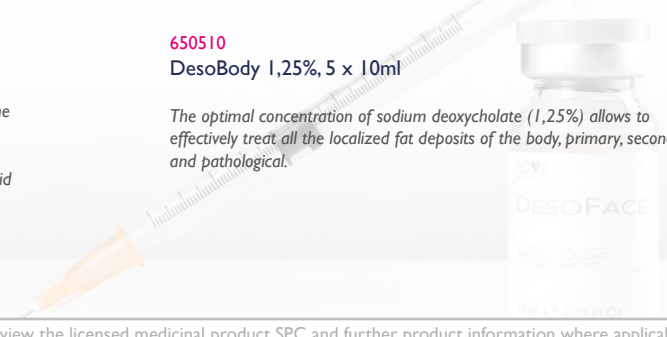

Sodium deoxycholate (0,5%) emulsifies adipocytes, caffeine promotes lipid catabolism Equisetum has a decongestant effect and draining.

DESOBODY

650510
DesoBody 1,25%, 5 x 10ml

The optimal concentration of sodium deoxycholate (1,25%) allows to effectively treat all the localized fat deposits of the body, primary, secondary and pathological.

PEELS

4EVER
UNIVERSAL
PRETREATMENT

600295
4EVER Universal
Pre-treatment Kit

2 PHASES. 4 ACTIONS.

4EVER is a universal pretreatment developed to be associated with BioRePeelCI3 protocol, but not only. It could be used before all aesthetic or dermatological procedures, including machines, whenever a skin preparation is required. The Kit is made up of an innovative two phase formulation; Microdermal Abrasion Cleansing Lipogel Carbon Salicylic Mask Antioxidant Neutralising Activator. 4EVER acts through mechanic, chemical and antioxidant action.

BioRePeelCl₃

BIPHASIC TECHNOLOGY

BioRePeelCl₃ is an innovative, biphasic, patented medical device with a biostimulating, revitalising and peeling action.

Thanks to exfoliating and keratolytic action, it promotes cell turnover by removing the outer corneal layer cells with selective action on corneocytes' junction bonds. The active ingredients' dermofunctionality contributes to a profound stimulation of skin replication and biosynthetic processes, essential to counter the effects of skin ageing and oxidative damage induced by UV radiation and pollution. BioRePeelCl₃ is manufactured according to pharmaceutical standards to guarantee the highest quality levels. Made in Italy.

Lipophilic Phase

Stabilising And Protective Actions

It prevents trichloroacetic acid oxidation and stabilises the formulation separating the aqueous phase from oxidating atmosphere inside the ampoule. It consequently improves performance and effectiveness of the product.

Filming And Vehiculating Actions

It reduces trans-epidermic water evaporation and assists active principles vehiculation.

Regenerating Action

It restores and maintains cutaneous hydro-lipidic film.

Moisturising Action

It increases hydration through direct and indirect mechanisms.

Hydrophilic Phase

Biostimulating Action

It stimulates fibroblasts' activity and activates cutaneous proliferating and biosynthetic processes.

Revitalising Action

It increases cellular turnover and production of collagen, elastin and hyaluronic acid.

Keratolytic And Peeling Actions

It removes outer cells of the stratum corneum by breaking corneocytes' adesion bonds. This process promotes active principles penetration.

Anti-Aging And Antioxidant Actions

It reduces fine lines by neutralisation of free radicals.

Anti-Acne Enlarged Pores Comedones

It helps battling acne, it eliminates comedones and it has an astringent effect on enlarged pores.

BIORELIFT

Post Treatment Cream

It is presented as a light emulsion of easy absorption, with a silky texture and a soft and enveloping skin feel from the first use. The formulation presents over 20 active substances, such as colloidal platinum-enhanced biomimetic peptides, micronized hyaluronic acid, amino acids, vitamins and a nourishing lipophilic phase of natural origin containing argan oil, almond oil, shea butter and bisabolol.

“Adjuvant for the biostimulant, revitalizing and lifting action”

4 Biomimetic peptides enhanced by colloidal platinum:

- **Dipeptide diaminobutyroyl benzylamide** is a peptide that mimics the crippling action of wagler's rattlesnake venom. It is a potent synthetic active ingredient, vegan and cruelty free, which simulates the action of a peptide contained in the snake's venom. It creates a botox effect with anti-wrinkle and anti-gravity action.
- **Copper palmitoyl heptapeptide-14 and heptapeptide-15 palmitate**, synergy of two biomimetic peptides in a single release system, through the bond with copper. It is a specifically targeted delivery system capable of releasing the active ingredient where it is needed. Thanks to the high affinity with the growth factors of fgf fibroblasts, they promote the production of collagen and elastin in the skin. They also act as antioxidants and in stimulating the production of glycosaminoglycans in addition to removing damaged collagen and elastin from the skin.
- **Acetyl tetrapeptide-17** is a peptide with a modulating action, more precisely it induces the synthesis of lumicans (a class of proteoglycans) by the dermal fibroblasts. These glycoproteins represent the scaffold of the dermis and organize the collagen fibers in three dimensions, thus maintaining the scaffold of the dermis.
- **Colloidal platinum** maintains the electrical balance in the epidermis, making the skin less susceptible to damage from free radicals and premature aging. Platinum stabilizes peptides, enhancing their effectiveness and inalterability. It is also a cellular renewal of the skin, destroys free radicals, reactivates cellular processes, moisturizes the skin improving the penetration of active elements.
- **Micronized hyaluronic acid** with high absorption, it carries out a marked moisturizing action thanks to its hygroscopic properties recalling water in the cellular matrix of the connective tissue and promoting the synthesis of collagen and elastin.

The formulation is completed by a pool of amino acids with a moisturizing and anti-oxidant action such as arginine, glycine, proline, leucine, lysine, isoleucine and valine and antioxidant vitamins such as pantothenol, vitamin E, vitamin B2 and vitamin C in its ascorbyl protected form glucoside.

600290
BioReLift,
200ml

BIOREHYDRA

600288	600291
BioReHydra, 30ml	BioReHydra, 200ml

Post Treatment Serum

BioReHydra is a post-treatment serum; it is presented as a hydrogel with a light, fast-absorbing texture that gives a fresh, moisturizing and lifting skin feel from the first application.

The formulation has over 15 active ingredients such as hyaluronic acid in micronized form (Micro-HA 5kDa), oceanic extracts, amino acids, vitamins and GABA.

**“Adjuvant for the biostimulant,
revitalizing and lifting action”**

BioReHydra is a powerful ally in biostimulating, revitalizing and moisturizing actions. Micronized hyaluronic acid 5-10 kDa is the only oligomer that quickly penetrates the inter-corneocyte barrier, retaining water in the connective cell matrix and increasing the production of collagen and elastin.

The power of 3 oceans:

- **Atlantic Ocean:** the extracts of *Ascophyllum nodosum* and *Halopteris scoparia* inhibit elastases and hyaluronidases (enzymes that destroy elastin and hyaluronic acid present in the epidermis) thus helping to reduce skin dryness, also modulate cytokine balance by strengthening the healing processes and have a soothing effect
- **Pacific Ocean:** *Macrocystis pyrifera* extract stimulates the action of HAS-2, an enzyme responsible for the production of hyaluronic acid, increases the synthesis of type III collagen and skin elasticity, improves skin repair mechanisms (stimulating the expression of the FGF7 gene), protects against oxidative stress
- **Indian Ocean:** the extract of *Caulerpa lentillifera*, also called sea caviar, guarantees the effectiveness, functionality and integrity of the layer between epidermis and dermis by activating the synthesis of collagen IV, laminin-5 and glycosaminoglycans with an increase in tonicity at the level of the dermis

The formulation is completed by a pool of amino acids with collagen booster effect such as GLYCINE, PROLINE, HYDROXYPROLINE, LYSINE, LEUCINE, ISOLEUCINE, VALINE, ARGININE. The action is enhanced by VITAMIN C in its protected form, ASCORBYL GLUCOSIDE which guarantees maximum efficacy as a cofactor in the synthesis of collagen and as an antioxidant. The latter activity is also mediated by VITAMIN B2. The rejuvenating effect is also supported by GABA which has a relaxing effect on fine “botox like” wrinkles and stimulating collagen synthesis.

COSMO PEEL

Intelligent Science Applied to the Skin

The Dermaceutic Cosmo Peel Treatment is a superficial chemical peel designed to reduce visible signs of ageing, acne and pigment spots while improving skin texture. Intended for the treatment of solar lentigines, superficial pigmented lesions, keratosis pilaris.

Why choose Cosmo Peel ?

Controlled penetration thanks to buffered TCA.
Wide range of concentrations:

- Epidermal to dermal stimulation for all phototypes.
- Targeted to full face application.

Benefits

- Eliminates pigmented lesions
- Improves the condition of keratosis pilaris through an exfoliative effect
- Boosts collagen and elastin production
- Homogenizes and revitalizes the skin
- Improves appearance of wrinkles and signs of premature aging

MASK PEEL

670155

Mask Peel,
25 applications

For oily skin, dilated pores and excess sebum Purifies epidermis and tightens pores.

- Suitable for all skin types and phototypes
- No social downtime (lunch peel)
- Little to no skin desquamation
- Safe & easy 10 min protocol
- Can accompany antibiotic treatments
- Purifies the epidermis
- Brightens dull complexion
- Decreases sebum production
- Tightens pores
- Regulates oily skin and dilated pores

MELA PEEL FORTE KIT

670156

Mela Peel FORTE Kit,
5 treatments

For pigment spots, melasma and postinflammatory pigmentation Reduces pigment spots and promotes homogeneous complexion.

- Reduces pigment spots & melasma
- Long-lasting results
- Improved skin radiance and brightness
- Evens skin tone and complexion
- Suitable for all skin types and phototypes
- Little to no social downtime
- Minimal risks of side effects
- Highly concentrated formulae for optimal efficacy
- Long lasting results with on-going patient care

“Immediately refreshed
with progressive rejuvenation”

Benefits at a glance

- Suitable for all skin types and phototypes
- No social downtime (lunch peel)
- Little to no skin desquamation
- Safe & easy 10 min protocol
- Can be combined and enhances the efficacy of other aesthetic treatments
- Reduces acne lesions
- Eliminates superficial pigmented lesions Improves the condition of keratosis pilaris through an exfoliative effect
- Boosts collagen production
- Improves appearance of fine lines and wrinkles

MILK PEEL BOX SET

670158

Milk Peel Box Set,
24 peels

A Gentle Peel.

Dermaceutic Milk Peel is a simple procedure and perfect for the busy person who wants quick results with no down-time. It is often the first peel people choose. Milk Peel is recommended for epidermal stimulation, dull complexion, wrinkles, smoothing effect for softer skin. With Dermaceutic Milk Peel, you will improve the texture and luminescence of your skin as well as reduce fine lines, increase hydration and decrease open pores.

For fine lines, dull complexion and loss of tone Restores a radiant complexion and stimulates the epidermis.

DERMACEUTIC
LABORATOIRE

UNIQUESKIN

The Professionals Choice

CHEMICAL PEELS

Combining efficacy & tolerance.

Ideal for sensitive skin thanks for Gluconolactone. Gluconolactone is the lactone form of gluconic acid obtained from glucose and bio-oxidation. A cyclic chemical structure resulting in a keratolytic action that is as effective as AHAs and better tolerated. Combined with other active ingredients, it reinforces the therapeutic effect, improves tolerance and overall results.

These peels are the ideal an anti-ageing solution, for patients wanting to erase the first signs of ageing, without needles and injections. No skin preparation is required by the patient before treatment and there is minimal to no 'downtime'. They are the most non-invasive method of eradicating wrinkles and can even be applied during lunch breaks.

FILLMED
LABORATOIRES

600711
FILLMED PrePeel
100ml

Fillmed Pre Peel is formulated to balance the skin pH before peeling procedures. For professional use only, the bottle of 100ml contains a degreasing formula that will lower the skin's pH levels to 4.

Removing all signs of grease, impurities, and make up, by using cotton swabs, the pores are then ready to absorb the active ingredients of peeling procedures.

Skin is thoroughly cleansed and penetration of peeling ingredients is highly effective thereafter. The skin is balanced at an optimum pH level appropriate for peeling procedures to be carried out.

600712
FILLMED PostPeel
100ml

Fillmed Post Peel is formulated to return the skin to the correct normalised pH after the peeling process. For professional use only, the acids are neutralised and skin returns to a normal pH of 8.

A bottle of 100ml Post Peel solution, suitable for application with cotton swabs or a gauze compression to skin is initiated to begin the healing process to regenerate skin cells quickly.

Fillmed Post Peel contains Sodium Hydrogen and Dextran Sulfate to aid the neutralisation process for post treatment of peeling. The results are effective pH adjustment.

600708
FILLMED Light Peel
100ml

Fillmed Light Peel is specially formulated for sensitive skins to iron out fine lines and wrinkles, whilst making the skin appear radiant and bright again. Youthfulness is restored to the skin. The Mandelic Acid works as the active ingredient to function as a peelant on sensitive skin. If you have a dull complexion, then Fillmed Light Peel can work miraculously to make your appearance look healthier with a natural glow.

Fillmed Light Peel is recommended for:

- Smoothing out fine lines and wrinkles
- Creating a radiant glow
- Eradicate dead cells and promote new cell growth

600709
FILLMED Time Peel
100ml

Designed to target fine lines and wrinkles for older skins. A unique combination of gluconolactone and glycolic acid, taking the skins pH to 1 for superficial peeling. Time Peel is our 'strongest' chemical peel. It can be used before all aesthetic and facial treatments and is suitable for all Fitzpatrick skin types.

Fillmed Time Peel is recommended for:

- Tackling fine lines & wrinkles
- Creating a radiant glow
- Eradicate dead cells and promote new cell growth

600710
FILLMED Bright Peel
100ml

Designed to target pigmentation and to lighten and brighten the skin. A unique combination of gluconolactone with phytic, citric and glycolic acids, taking the skins pH to 1.5 for superficial peeling. Bright Peel gives instant uniformity of the skin and works on long term improvement of pigmentation.

Fillmed Bright Peel is recommended for:

- Tackling pigmentation
- Creating a radiant glow
- Eradicate dead cells and promote new cell growth

NEOSTRATA®

THE SCIENCE OF VISIBLY HEALTHY, EVEN SKIN

The NeoStrata® Difference.

The NeoStrata® ranges are designed to be the optimal combinations of potent anti-ageing skincare ingredients to address the multitude of skin conditions and ageing issues that we encounter in our daily lives.

NEOSTRATA® dermatologist grade formulas contain clinically-proven ingredients to help improve specific skin conditions and visible signs of ageing. The result of over 30 years of research and skincare science innovation, ensures that the products work synergistically to deliver optimal skin health for your patients.

NeoStrata focus on skin inclusivity, and respect and represent the dermatological needs of a diverse patient demographic.

NEOSTRATA® ProSystem

NEOSTRATA® ProSystem is a highly effective, superficial peeling system. ProSystem offers a range of peel options, including peels intended for specific skincare concerns enabling you, the practitioner to safely design a treatment plan around your patient's needs. These clinical-strength chemical peels provide a powerful combination that addresses your most pressing skin concerns including fine lines, wrinkles, skin discoloration and oily and acne-prone skin.

How does it work?

Precisely formulated products to correct multiple types of visible discoloration through skin renewal in 3 ways:

- Exfoliate the surface layers of your skin, revealing smooth, new layers.
- Optimal pH level to enhance effectiveness.
- Targeting the building blocks of skin to volumize appearance for long-term results, with continued use.

SEBOLYTIC

MESOTHERAPY

***“Rejuvenate and tighten skin,
as well as remove excess fat”***

Mesotherapy is a treatment that has been used with great success in the most diverse fields of application in France since 1952. Developed by the French physician Dr. Michel Pistor, the method, which involves injecting hyaluronic acid to rejuvenate the face, has become firmly established around the world as an effective method of slowing down and correcting the effects of ageing by improving the texture, density, hydration and brightness of the skin.

Mesotherapy delivers nourishing substances to the layers of the skin where cell repair and growth occurs. Vitamins, amino-acids, minerals, hyaluronic acid, all essential components for healthy skin cells can be delivered by mesotherapy. This treatment helps improve dull, tired looking skin; dry, lifeless skin, superficial wrinkles and is ideal for pre or post-operative skin conditioning.

With the correct ingredients and protocols Mesotherapy due to its direct delivery can stimulate cell metabolism, increase the production of collagen and promote the body's circulatory, lymphatic and immune systems to create a biological response giving us a younger, firmer and nourished skin.

Today, mesotherapy is used to treat:

- Dry and Dehydrated Skin
- Skin Tone and Texture: Dark Spots and Sun Damage
- Acne, active and dormant
- Hands, dark spots and sun damage. For a firmer, more youthful skin
- Decolletage: Wrinkles and Sagging Skin on the chest and neck
- Body Treatments: Stretch Marks

The technique uses very fine needles to deliver a series of injections into the middle layer (mesoderm) of skin. The idea behind mesotherapy is that it corrects underlying issues like poor circulation and inflammation that cause skin damage.

Revitalise Skin Quality

NANOSOFT BTE

NANOSOFT by FILLMED | CE-certified medical device.

Inspired by vaccine administration techniques, NANOSOFT is a real revolution in aesthetic medicine. It features a new type of needle that provides a one-stop solution for treating the face, neck and décolletage. The injections are very accurate and standardised, making the procedure easier with proven results.

For patients, it guarantees an effective, near-painless procedure. Comprising of three 0.6-mm long microneedles, made from silicone crystal, it will not go blunt during the treatment. It's ideal for targeting the dermis with NCTF®, as it will sit just above the epidermal junction, for optimise results. NANOSOFT is around three times smaller than a typical injection needle.

Target dark circles, wrinkles and tired eyes, using Nano Soft & NCTFI35ha

Target neck lines and wrinkles and creepy skin. Using Nano Soft, NCTFI35ha and MHA10.

M-HA CE

M-HA®10 is a visco-elastic solution aimed at restoring the loss of hyaluronic acid due to skin ageing. It is designed to be injected into the upper dermis as a 'skin booster' to improve the hydration, radiance and elasticity of the skin and to serve as a filling agent for small wrinkles such as crow's feet, laughter lines or lines around the mouth caused by smoking. It works to improve the water barrier of the skin.

HA (Hyaluronic acid) is a miracle advancement in skin care technology. Once injected, the active ingredients work to restore the skins natural hydration levels, making skin feel more firmer and less saggy. MHA10 is 10mg of pure, uncross linked hyaluronic acid, CE marked for injection purposes. It can be injected using Nano Soft needle, but ensure to let patients know the papules can last up to 48 hours (As it hydrates the dermis for longer).

NANOSOFT is around three times smaller than a typical injection needle.

600698
M-HA 10 CE FMED,
3x3ml

M-HA 10 is 10mg of sterile, uncrosslinked, hyaluronic acid for use with needling devices and as a skin booster to increase hydration.

NCTF I35 HA CE

NCTF® 135HA is a unique, Positive Pro-ageing, polyrevitalising solution that provides the dermis with the essential ingredients it needs to thrive. It creates the optimal environment to reboost fibroblasts activity, which are responsible for the production of collagen, elastin and hyaluronic acid. NCTF® 135HA stimulates the skin without changing the facial features or expressions. Containing free HA, the New Cellular Treatment Factor (NCTF®) smoothes out fine lines, restores radiance, deeply nourishes the skin and increases density of the dermis.

Multi-weight hyaluronic acid draws and binds water from the atmosphere into the skin. Using an optimum blend of hyaluronic acid weights ensures skin is highly moisturised from the deepest layers to the surface.

C-Tetra daily vitamin C serum fights visible signs of ageing and restores the skin's glow with a powerful antioxidant combination of vitamin C and E, fighting the damage caused by the sun and pollution.

A lightweight Intelligent Retinol (vitamin A) serum. Designed to complement skin's nightly regenerative cycle, Retinol 3TR™ resurfaces skin to reveal rejuvenated skin and radiance.

Formulated with retinaldehyde, Crystal Retinal™ works in with the skin's natural mechanisms to enhance collagen production and speed up cellular turnover. Works upto 11x faster in the skin than classic forms of retinol.

Salicylic and mandelic acid dissolve deep-seated impurities and oil to decongest and tighten pores, whilst natural jojoba grains gently exfoliate away dead skin cells to help perfect the texture of the complexion.

This pH balanced, alcohol free toner helps to hydrate and soothe the skin whilst removing excess oil and impurities. This gentle toner is suitable for all skin types as it calms and hydrates the skin whilst also enhancing the skin's texture.

Gentle Cleanse removes dirt, make-up and impurities without disturbing the skin's moisture levels. Great for sensitive skin, this cleanser is lightweight, hydrating and leaves skin renewed and radiant.

The Micellar Mousse is a luxuriously creamy, sulphate-free mousse; that effortlessly removes make-up and dirt while being extremely gentle on the skin.

Blemish Control Pads are pre-soaked in a clarifying maximum strength salicylic acid serum which dissolves oil and dirt deep down within the pores to treat problem complexions.

Intensely hydrating SPF 30 moisturiser is the most advanced Medik8 day cream ever. Advanced Day Total Protect is formulated to include Pollution Shield, anti-infrared, anti-blue light and anti-A.G.E technology.

Experts in collagen products with a holistic, inside-out approach to beauty and wellness. The Proto-col range was born out of personal experience. Competing in international modern pentathlon, James Greenwell tore an Achilles tendon late in his career. Collagen was instrumental to his recovery. After retiring from elite sport, he launched the Proto-col brand with a collagen supplement and a wealth of ideas.

Aftercare lines for Sunekos Treatments

A convenient single-use, peel-off mask with a powerful biorevitalising and hydrating action that smooths the skin and targets wrinkles, leaving the skin radiant.

Designed for daily use, this cream provides the skin with beneficial active ingredients and protects it from oxidative stress caused by UV rays, known as one of the main cause of skin aging.

Designed to maximise the anti-aging action. This serum has a high concentration of active ingredients, designed to deeply nourish and stimulate the skin.

Formulated to target puffiness and dark circles as well as promoting firmness around the eye area. With continued use, this Eye Contour Gel returns firmness and elasticity to the skin, defining the eye area for a younger, brighter look.

Formulated to ensure dehydrated, stressed skin lacking tone receive a deep restructuring and moisturising action. It provides normal skin with the elements they need to preserve the ideal levels of moisture.

The Nutrakos Drinkable Sachets contain amino acids which assist in the production of collagen, elastin and hyaluronic acid. Consequently, the texture and appearance of the skin is noticeably improved.

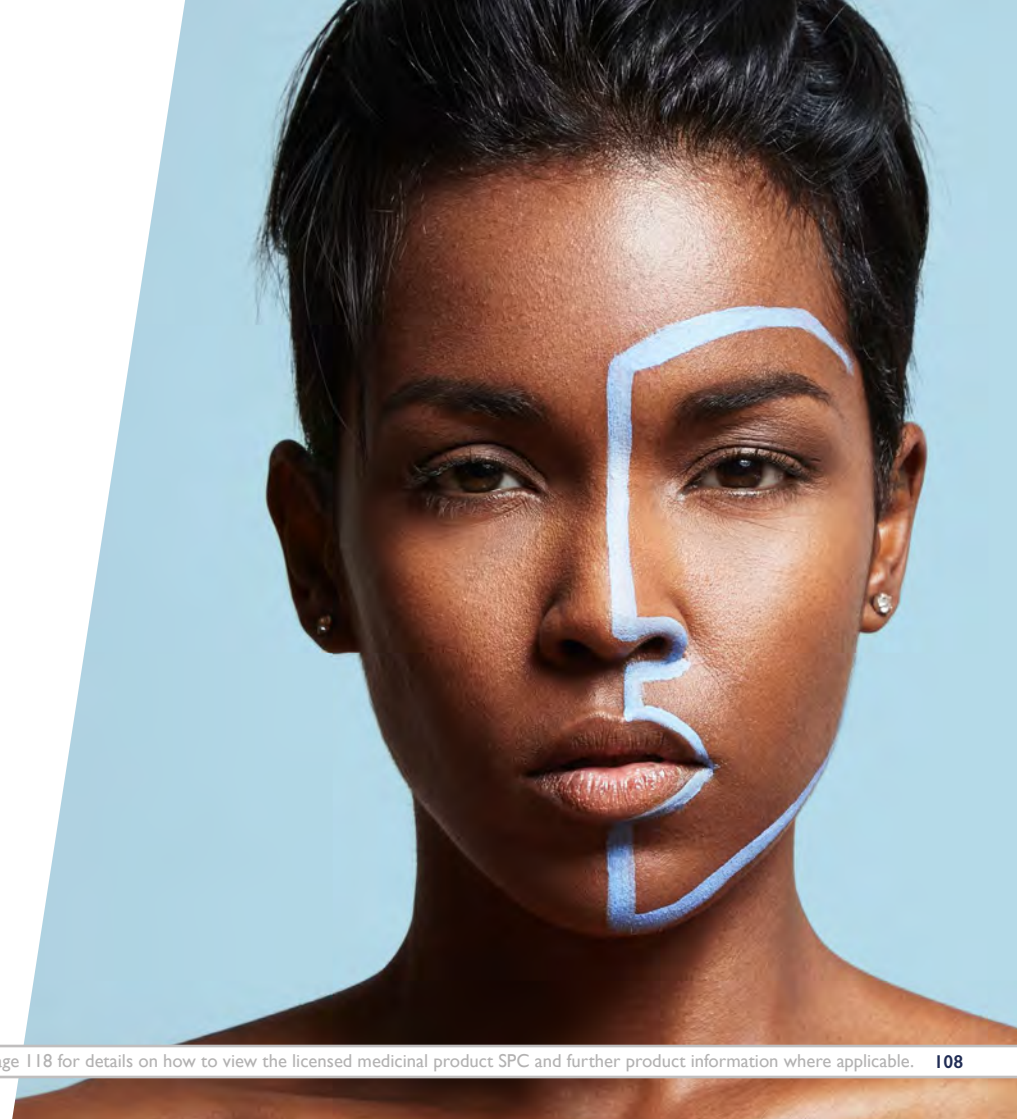

The Post Peeling Cream from Sunekos is an emulsion with moisturising and soothing properties suitable for the restoration of skin subjected to peeling cosmetic treatments.

Made with sodium hyaluronate and a pool of the amino acids. This composition has proven to be effective in inducing fibroblasts and keratinocytes to synthesise the proteins that are essential for the injured area to recover.

“Start your journey with Aesthetics today”

Aesthetics, by Dentists for Dentists.

“Combined with advanced injecting and patient management skills. Dental professionals are uniquely placed to deliver facial aesthetics. We have a keen aesthetic eye and are able to deliver with precise injection techniques.”
Dr Priya Gaiind, Director of Clinical DD, Dentist

Our approach is unique. Facial aesthetics is a hot new opportunity for dental practices. With a deep understanding of the facial anatomy combined with advanced injecting and patient management skills, dental professionals are uniquely placed to deliver therapeutic, functional and traditional aesthetics to their existing patients.

We provide everything you need to help you get your facial aesthetics business started.

Many dental practitioners don't realise how aesthetic products can treat many common dental issues, from gummy smiles, smile design and bruxism. Aesthetic treatment options deliver functional benefits, whilst providing a bridge into aesthetics. Many practitioners don't realise their future aesthetic patients are the same dental patients they currently see.

Tailor made for Dentists

We have partnered with Angel Medical Academy to provide you a bespoke aesthetics training experience exclusively for dentists. They offer CPD accredited training in a clinical environment and with a small group, where everyone can have the opportunity to practice under the exclusive watch of experienced trainers. The Gateway to Aesthetics programme will include an Introduction to Toxins, and also Dermal Fillers. The 2-day courses are suitable for anyone starting out in aesthetics and want to add more treatment options to their dental practice. theangelclinic.co.uk/gateway-to-aesthetics

Testimonial

“Aesthetics in dentistry has many therapeutic applications for our patients as well as cosmetic.

It helps to support your dentistry financially and allows you to offer services other clinicians are unable to. Aesthetics has enabled our practice to be more profitable without increasing chair time significantly.”

Dr Donna Mills

Cost Calculator

Agree, can we add initial sentence of Aesthetics is a very profitable revenue stream, Although the tables are based very simply on cost of just one product and is taking in a Trios as an added extra. This doesn't consider other treatments that come from a Trios as well, for example Clear aligners or Teeth whitening. Combining Digital Dentistry and Aesthetics will create a very comprehensive offering within your practice. We can help you make the most of your investment.

Take the average number of Aesthetic patients patients per month to work back on your return on investment (ROI) and average cost

- £300 toxin 3 area injection (3 monthly roughly)
- £400 toxin to stop teeth grinding (4 monthly roughly)
- £300 Filler average (3 monthly roughly)
- Sunekos - £250 per vial (depending on course lasts 5 months after first course)

- Approx pricing based on survey of 50 practices across England.

Start-up costs for Aesthetics

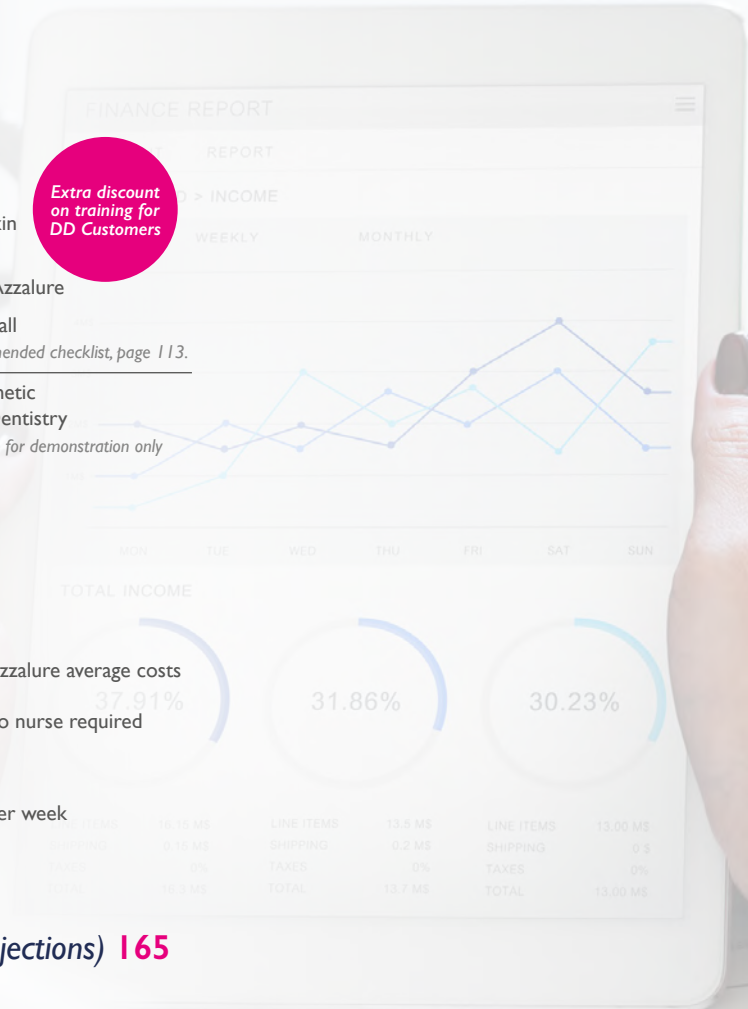

Training	£2,199.00	Approx costs of foundation Toxin and Filler course
Product	£150.00	One prescription of Botox or Azzalure
Sundries	£300.00	This could include Fridge's and all other consumables - See recommended checklist, page 113.
Optional Extra Trios 3	£22,117.00	Optional extra to provide cosmetic dentistry across all parts of a Dentistry - Offers and promotions available price for demonstration only

Total £24,766.00

Per patient costs and Profit

Product Cost	£150.00	Based on Botox and Azzalure average costs
Price per patient	£300.00	20 mins in chair and no nurse required
Profit	£150.00	
Weekly profit	£450.00	Assuming 3 patients per week

Number of weeks to break even 55
Number of Patients treatments (3 area Injections) 165

eSCRIPT

DD's Online Pharmacy

eScript is an electronic prescription service available to all DD account holders. It's designed to help you break free from the shackles of time-consuming paper prescriptions!

eScript removes the hassle of handwritten scripts, posting originals and keeping paper records. It is simple and fast to use and saves you valuable time and money. You can access your prescription records 24/7 and order repeats at the click of a button. eScripts' secure system allows you to store and retrieve prescription records instantly.

All this, plus no dispensing fees! eScript is easier, faster and more secure.

For all information regarding licensed medicine's Summary of Product Characteristics (SPC) please use the following website for all information
www.medicines.org.uk/emc/

OPEN AN ESCRIPT ACCOUNT TODAY

1. Download and complete the [Account Opening Form](#) and email to contactcentre@ddgroup.com
2. As soon as we've verified your details you can upload patient details, scripts and place prescription orders immediately.

Please note: If the prescriber is not treating the patient personally, we require a letter from the prescriber that a 'Face to Face' consultation and physical examination has taken place. Our staff will be happy to provide prescribers with further information.
